

SAGICOR TECHNOLOGY

STEC Executive Briefing

Technology Capability Assessment

The Workforce at a Glance

This is not a survey. This is a capability map of every technology professional in the organization.

The AI Readiness Spectrum

The 80% are not skeptics. They are professionals waiting for organizational clarity.

What the Workforce is Asking For

They did not wait to be asked. They wrote it in.

The Positive-to-Negative Ratio

POSITIVE SIGNALS

Proud of work

Strong team cohesion

Supported by manager

Enjoying work

Feeling valued

Empowered to decide

Positive with manager

393

298

235

208

203

179

165

CHALLENGING SIGNALS

Unsupported

Career uncertainty

Workload concern

Overlooked

Tech keeping up

49

34

34

23

23

9:1

Ratio: 9 to 1 positive.

The Engagement Signal

THE 1-5 SCALE

- 1 No experience or exposure
- 2 Basic awareness, needs support
- 3 Competent, works independently
- 4 Proficient, handles complexity, guides others
- 5 Expert, deep mastery, leads and innovates

Completion Momentum

When Jamaica opened, the workforce moved. When Barbados opened, 93% engaged within 24 hours.

7%

of manager validations are complete

Region	Sent	Done	Rate
Canada	47	15	32%
Jamaica	213	10	5%
Barbados	74	2	3%
USA	16	0	0%
Trinidad	24	0	0%
Panama	2	0	0%

We need 50 to 100 manager validation responses to enrich the final assessment picture.

The Regional Picture

What the Scores Tell Us

Employees rated themselves on a 1-5 scale across technical skills, tools, processes, and behaviors.

SCORE	WHAT IT MEANS	%	COUNT
4.0 - 5.0	Proficient to Expert — handles complexity, guides others, deep mastery	6%	(17)
3.0 - 4.0	Competent — works independently on standard tasks, solid foundation	59%	(172)
2.0 - 3.0	Developing — basic awareness, needs support on complex work	34%	(~99)
1.0 - 2.0	Early Stage — minimal experience, requires significant guidance	1%	(~3)

59% of the workforce has a solid foundation.

These are the employees ready for targeted investment — the "medium talent" who can become "top talent" with the right development.

Only 1% rated themselves at the lowest tier. The workforce is not starting from zero.

The Top Themes

Collaboration. Improvement. Growth. These are the words that define this workforce.

Sentiment by Department

Sentiment score reflects how positively employees describe their work environment, team dynamics, and manager relationships — derived from qualitative response analysis.

Every department scores above 7.0.

No department is in crisis. Even Service Delivery at 7.1 is in positive territory.

Application Dev (USA) leads at 9.4 — exceptional engagement.

The 2.3-point spread suggests consistency, not isolated pockets of concern.

The Hidden Talent Pattern

Managers see more than employees see in themselves.

The purpose is not to rank people. It is to find them.

What We Navigated

CHALLENGE		RESOLUTION	STATUS
Data fragmented across 12+ sources	→	Unified roster built	SOLVED
Reporting lines mismatched	→	Real-time corrections	SOLVED
Assessment caused anxiety (North America)	→	Blueprint revised	SOLVED
Wrong employees in scope	→	Removed on confirmation	SOLVED
Outdated role mappings	→	Profiles corrected	SOLVED
DPA awaiting signatories	→	Signatories confirmed	SOLVED
SBBL missing manager data	→	Data received	SOLVED
Southern Caribbean gaps	→	Titles/emails received	SOLVED
Central America incomplete	→	Profiles complete	SOLVED
Platform issues reported by users	→	Team receiving feedback and actively working on fixes	IN PROGRESS

40+ issues identified. 9 resolved. 1 actively being addressed.

Platform fully operational across all six countries.

Your Dashboard

Real-time visibility into your team's participation. Your dashboard link will be sent this week.

What Every Employee Gets

Once the full assessment is complete, every technology employee will receive:

Personal Capability Profile Where they stand across technical skills, behaviors, and AI readiness	Development Plan Actionable steps tailored to their role and growth trajectory
Training Recommendations Specific courses, certifications, and learning paths	Milestones Clear markers of progress they can track

This is not a one-time report. This is an ongoing development journey.

Goal: 95%+ of employees with actionable development plans and clear evidence of progress.

Development Investment is Coming

Training capabilities are being prepared:

- Structured Learning Paths**
Role-specific development tracks being designed
- Mentorship and Coaching**
Pairing emerging builders with senior technical leaders
- Ongoing Capability Building**
Not a one-time event — continuous investment

The assessment tells us WHO to invest in and WHAT they need.

The training program delivers that investment.

What's Next

What We Need From You

1

Drive Manager Validation Completion

50-100 responses before Monday

2

Escalate the Data Gaps

DPA, SBBL, Southern Caribbean, Central America

3

Flag Anticipated Problems

What should we prepare for?

**The workforce is not waiting to be
convinced.**

They are waiting for investment.
